

Playing Guidelines

1 What is Lotto?

Lotto is a fixed-prize game of chance which is played using a field of numbers from one (1) to ninety (90). Five (5) winning numbers are randomly drawn for each Lotto draw to determine the winning combinations.

There are four (4) basic playing options:

- Prima - One (1) number is chosen, and a bet is placed on the first (1st) number drawn
- Ambo - Two (2) numbers are chosen, and a bet is placed on any two (2) of the five (5) numbers drawn
- Terno - Three (3) numbers are chosen, and a bet is placed on any three (3) of the five (5) numbers drawn
- Quaterno - Four (4) numbers are chosen, and a bet is placed on any four (4) of the five (5) numbers drawn

An additional option is Terno-Ambo, where three (3) numbers are chosen, and a bet is placed on any two (2) or three (3) of the five (5) numbers drawn. A combination of one Terno bet (3 of 5) and 3 Ambo bets (2 of 5) is created, being the combination of the same three (3) numbers picked for Terno.

2 Playslip Description

The Lotto playslip is used by the players before purchasing a Lotto ticket to indicate their selection of numbers and playing options (e.g. game type, price, multiplier, number of consecutive draws, etc.). The following illustration demonstrates how a Lotto playslip is filled in:

The illustration shows a digital Lotto playslip interface with the following sections and callouts:

- GAME TYPE:** Located at the top left of each playing board, with callouts pointing to the 'A', 'T', 'TN', and 'QL' buttons. Description: "Here you select the type of game you would like to play".
- STAKE:** Located at the top right of each playing board, with callouts pointing to the 'A6', '1', '2', '3', '5' buttons. Description: "Here you choose the stake you would like to participate with".
- QUICK PICK:** A checkbox located below the number grid on each board. Description: "You mark this box if you would like the terminal to choose your numbers".
- MULTIPLIER:** A section at the bottom of the playslip with callouts pointing to the '5', '2', '4', '3', '4', '7', '8', '1', '10', '16', '25' buttons. Description: "You mark this area if you would like to multiply your stake".
- CONSECUTIVE DRAWS:** A section at the bottom of the playslip with callouts pointing to the '5', '2', '4', '3', '4', '7', '8', '1', '10', '16', '25' buttons. Description: "Here you mark the number of consecutive draws you would like your playslip to participate in".
- VOID:** A checkbox located below the number grid on each board. Description: "You mark this box when you would like to cancel the Playing Board".
- Playing Boards A to D:** Four identical playing boards labeled A, B, C, and D. Callouts point to the number grids. Description: "In each Playing Boards A to D, choose your own numbers".
- Quaterno Game Details:** A central section with the text "PLAY Quaterno MATCH 4 OUT OF 5 NUMBERS & WIN €500,000 T&C Apply".

3 Lotto Ticket Description

The ticket is the unique valid document for claiming winning prizes. The following is an illustration that represents a visual of the Lotto ticket, including the information displayed on the ticket.

Figure 1: An indicative Lotto Ticket Receipt

- Game logo
- Draw date in which the ticket is participating
- Validity of the ticket, including draw number
- Barcode number
- Playing Board(s) including: Numbers chosen, Game type, Stake, Quick Pick if selected, Number of Combinations.
- Multiplier value
- Price of the ticket
- Ticket number
- Date and Time of purchase
- Barcode and Retailer ID

It is the player's entire responsibility to ensure that the selections printed on the ticket are correct in line with the ones selected.

The player has the possibility to cancel a ticket from an authorised agent, up to 10 minutes after the purchase but not later than the stipulated cancel close time.

4 How Lotto is Played

4.1 Simple Columns

To play a simple column in Lotto, the player should mark one (1) to four (4) numbers (with an 'X') according to the type of game selected, in at least one (1) of the four (4) Playing Boards (Boards) of the playslip.

The game types available are:

- **Prima** – where a player must choose one (1) number and mark the box [P]
- **Ambo** – where a player must choose two (2) numbers and mark the box [A]
- **Terno** – where a player must choose three (3) numbers and mark the box [T]
- **Terno-Ambo** – where a player must choose three (3) numbers and mark the box [TA]
- **Quaterno** – where a player must choose four (4) numbers and mark the box [Q]

The Terno-Ambo selection is a special playing style where the player selects three (3) numbers to create one (1) Terno combination of three (3) numbers and three (3) Ambo combinations of two (2) numbers.

The player is allowed to play only one game type option per Board. The Quaterno game type option has to always be played on a separate playslip with a basic stake of €2.00.

The player may also choose to play by verbally communicating the choices to the authorised agent at any National Lottery point of sale.

4.2 Systems

A Fully Expanded System entry is an alternative way of playing Lotto, providing the player with more chances to win.

A System entry allows the player to select more than the minimum amount of numbers but not more than twenty (20) in a single Playing Board, for each game type.

- Prima – a player may choose more than one (1) number
- Ambo – a player may choose more than two (2) numbers
- Terno & Terno-Ambo – a player may choose more than three (3) numbers
- Quaterno – a player may choose more than four (4) numbers

The four tables on the following page show the columns created in each System of Prima, Ambo, Terno and Quaterno, with the respective cost for each column.

The minimum stake for Prima, Ambo, Terno and Terno-Ambo is €0.50. The price for Quaterno is €2.00 per combination played.

Prima						
Numbers Chosen	Combinations Played	Cost in Euro (€)				
		0.50	1.00	2.00	3.00	5.00
2	2	1.00	2.00	4.00	6.00	10.00

20	4,845	9,690.00

4.3 Full Quick Pick

Full Quick Pick is a fully automatic number selection method whereby the terminal generates all of the numbers, according to the game rules. The player should mark the Quick Pick box on any one of the four (4) Boards, together with the preferred game type. The player should also mark the basic stake.

4.4 Partial Quick Pick

Partial Quick Pick is a semi-automatic number selection method, whereby the system generates numbers complementary to the numbers selected by the player or the authorised agent. If the player chooses only some of the numbers in the Numbers Area on one Board, the rest of the numbers for the same Board are quick picked by the system.

4.5 Different Playing Methods on One Playslip

The terminal allows the player to include different playing methods on one playslip. For example, on the same playslip, the player can play a Simple Column in the first Board, Systems in the second Board and a Quick Pick in the other Boards.

4.6 Cancellation of a Playing Board

The player is allowed to cancel one or more of the filled in Boards on the playslip by marking the [VOID] box of the relevant Numbers Area.

4.7 Shares

Shares offer the possibility to a group of players to take advantage of and participate with more numbers and combinations, thus giving the players more chances to win. This is made possible by splitting the Lotto ticket into 8 to 100 shares. The price of the total Lotto ticket is split equally between the number of players.

All players pay their shared Lotto ticket separately and get their own share of the Lotto ticket receipt. For example, if a €40 ticket is split into ten (10) parts for ten (10) players, the price of each part is €4, whereby players pay for their share of the participation.

The minimum price of the share is €4 and the maximum price is €32.

The maximum price of the whole shared ticket shall be €5,000.

5 Lotto Draws

5.1 When can Lotto be played?

Players can play Lotto from Monday to Sunday during the allowed playing hours, excluding the draw break. A Lotto draw is conducted every Tuesday and Saturday.

The draws are broadcast live on TV with the live stream and recorded draws, also available on the National Lottery website. Participation is allowed until 30 mins before the draw time.

5.2 How is the Draw conducted?

The Lotto draw is held in the presence of:

- i. A representative of the Malta Gaming Authority
- ii. A Notary Public

The Notary Public, who will be present at the draw, will draw up and sign a record of the proceedings which are entered in a register kept for that purpose.

5.3 Consecutive Draws

The player is given the choice to participate with the same playslip in more than one draw by marking the relevant box/es in the 'CONSECUTIVE DRAWS' section.

The player has the possibility to increase the frequency of participation by two (2) and up to ten (10) draws, by marking the respective box from two (2) to ten (10) within the 'CONSECUTIVE DRAWS' section. Additionally, the player may further increase the selected number of participation draws by marking the [x2] and/or [x3] box/es.

The player can participate in up to a maximum of 60 consecutive draws.

Example: If a player selects the boxes [7] and [x3] in the 'CONSECUTIVE DRAWS' section, his ticket will participate in 21 consecutive draws.

5.4 Lotto Liability Limits

Lotto will support a draw liability limit which shall be configured to a pre-defined amount. Once the liability limit has been reached, National Lottery plc. may reject any subsequent attempts to place Lotto bets on the specific combination(s) that would cause the draw liability to exceed the limit.

6 Cost of Entry in Lotto

The Stake amounts of €0.50, €1.00, €2.00, €3.00 and €5.00 are included in the stake area on the Lotto playslip. The player should mark with an 'X' on the preferred basic stake to participate with in a selected Game Type, as shown in Examples Section 8 below.

The minimum stake for Prima, Ambo, Terno and Terno-Ambo is €0.50.

The basic stake for Quaterno is €2.00. The Quaterno game type has to always be played on a separate playslip.

6.1 Terno-Ambo

For the Terno-Ambo game type, stakes shall distributed between Terno and Ambo game types as follows:

- €0.50 is for one Terno of €0.20 and three Ambos of €0.10 each.
- €1.00 is for one Terno of €0.40 and three Ambos of €0.20 each.
- €2.00 is for one Terno of €0.80 and three Ambos of €0.40 each.
- €3.00 is for one Terno of €1.20 and three Ambos of €0.60 each.
- €5.00 is for one Terno of €2.00 and three Ambos of €1.00 each.

6.2 Multiplier

In the 'MULTIPLIER' section, the player has the option to multiply the basic stake by marking the box with the selected multiplier.

By marking the respective box within the 'MULTIPLIER' section from two [2] up to ten [10], the player has the possibility to multiply the stake by two (2) up to ten (10) times. For example, if the player selects the multiplier [6], the stake will be multiplied by six (6) times.

By additionally marking the boxes [x5] and/or [x10], together with one more multiplier box from two [2] up to ten [10], the player has the possibility to further multiply the stake by up to five hundred (500) times (i.e. if the three boxes [10], [x5] and [x10] are marked).

Note: The 'MULTIPLIER' box marked will multiply the total stake for all the Playing Boards filled on the playslip. A player will not be able to make use of the multiplier, if in any Board of the playslip the player plays the Quaterno game.

7 Lotto Prizes

7.1 Winning Categories of Lotto

To win in Lotto, the player must match the selected numbers with the drawn numbers. The more numbers the player plays, the greater the winning probabilities.

Following is a table showing the corresponding winning amounts and odds for each Game Type:

Game type	Numbers matched	Winning amount	Odds
Prima	One (1) – the first number drawn	70 x the stake	1:90
Ambo	Two (2) out of five (5) numbers drawn	250 x the stake	1:400
Ambo (T-A bet)	Two (2) out of five (5) numbers drawn	250 x the partial stake*	1:400
Terno (T-A bet)	Three (3) out of five (5) numbers drawn	4,000 x the partial stake*	1:11,748
Terno	Three (3) out of five (5) numbers drawn	4,000 x the stake	1:11,748
Quaterno	Four (4) out of five (5) numbers drawn	€500,000	1:511,038

*partial stake means a part of the stake in Terno-Ambo bet that is assigned to the Ambo or Terno bet (e.g. €0.10 and €0.20 respectively for minimum stake of €0.50).

If in any draw, there is more than one (1) simple column winning the Quaterno Category prize, then the prize will be split according to the number of winning columns.

Example: If Player A plays a Quaterno system of five (5) numbers and matches five (5) numbers, and Player B plays a Quaterno with four (4) numbers and matches all four (4) numbers, then both are winners of the Quaterno prize. Player A will win €416,666.67 (5 top winning simple columns) whilst Player B will win €83,333.33 (1 top winning simple column).

8 Examples

The design of the below examples are indicative at the time of writing.

8.1 Simple Column Example

The image shows a National Lottery Quaterno ticket with four columns (A, B, C, D). Each column has a 10x10 grid of numbers from 1 to 90. Column A has 'X' in the first row and '35' in the third row. Column B has 'X' in the first row. Column C has 'X' in the first row. Column D has 'X' in the first row. The ticket also features a QR code, the website www.lottery.mt, and a 'PLAY' button. At the bottom, it says 'MATCH 4 OUT OF 5 NUMBERS & WIN €500,000' and includes options for 'MULTIPLIER' and 'CONSECUTIVE DRAWS'.

Playing Board: A

Game Type: Prima

Number of Columns: 1 column

Stake Amount: €1.00

Cost of Ticket: 1 column x
€1.00 (stake) = €1.00

8.2 Quaterno Example

The image shows a screenshot of the National Lottery website interface for the Quaterno game. At the top, there is the National Lottery logo and a QR code. Below the logo is the website URL www.lottery.mt. The main content area displays four playing boards, labeled A, B, C, and D, arranged in a 2x2 grid. Each board has a 'GAME TYPE' section with buttons for 'P', 'A', 'T', 'TA', and 'Q'. Board A has 'TA' selected with an 'X', while boards B, C, and D have 'Q' selected. Each board also has a 'STAKE (€)' section with buttons for '0.5', '1', '2', '3', and '5'. Below the stake section is a 'NUMBERS - Select up to 20 Numbers' section with a grid of numbers from 1 to 90. Board A has numbers 11, 19, 35, and 66 marked with an 'X'. At the bottom of the playing boards area, there is a 'PLAY QUATERNO' button and a summary of the game rules: 'MATCH 4 OUT OF 5 NUMBERS & WIN €500,000'. Below this, there are sections for 'MULTIPLIER' and 'CONSECUTIVE DRAWS', each with a grid of numbers and multiplier options.

Playing Board: A

Game Type: Quaterno

Number of Columns: 1 column

Stake Amount: €2.00 (basic stake)

Cost of Ticket: 1 column x €2.00 (stake) = €2.00
